I gathered some old pictures from cncden, like the sniper rifle and stuff.

The Laser Rifles only need a skin change..Then we have the old renegade model.

The sniper rifle can be remade with these pictures. We already have one of it on another topic.

I hope someone can remake this sniper rifle, cause I like it very much...I just haven't been able to find it in the original renegade yet, I think we were just lucky with the pistoll remade...

the old sniper rifle does look awesome, and so do the Nod soldiers

the Nod soldiers are in the always.dat, if someone could use XCC mixer and put them ingame that would be sweet, you just have to bone them

1-i start topic about this again...

2-i love this sniper too

3-i search this sniper 5 years (gg)

4-AircraftKiller got all renegade E3 beta stuff...

any help would be great...

I've got stuff for ya all ready.

I made myself a little personal mod that gives you a more "beta-ish" single player.

This post includes skins for the beta Nod soldier, laser rifle, and laser chaingun. They also make the lasers blue.

Well...To sticky it might be usefull since lot's of people are looking for the beta models. They can find it easily then and if we keep posting the model pics here, the people that want to remake the weapons can find it easily too. Else we'll get about 5 or more messed up topics about the same thing...

The model thus far. I plan on changing the back of the scope. I had to canibalize the image. Let's just say it was sloppy.

\*edit\* you will also notice that they changed the model.. i went by the black picture. The one that has the perfect right side view.

No you would have to rebone the whole model and rename everything. Then you must export it to w3d again. And you can only use it yourself, servers cannot use it and players cannot load it from the server.

And btw, I found some picture of a pre-release auto rifle:

Also, the tiberium crystals can be found as tiberium.w3d somewhere in renegade's files. The glow is done with some emitter. I remember doing something alike once:

Are you serious? If so: Wow! and why did it take you 5 years to mention it? Share omg.

Also, the tiberium crystals can be found as tiberium.w3d somewhere in renegade's files. The glow is done with some emitter. I remember doing something alike once:

edit: about the gun, you do also realise april fools was yesterday right?

can you post full working file of these tib crystals pls im search it long time too  
and say this flashlights from renz0r's dazzle mod? i got same but made by myself but no light  
towers you can help with it?  
lets better talk pm?

I already contacted Petroglyph (Westwood) about the possibility of getting that stuff. They said that is was now property of EA and they cannot give it out.

Slave, can you please post those light towers and the tiberium models...I like them very much.  
And Scrin I like your tiberium skin. Can you send me that one?

If some people are interested, I have some nice stuff too .

Like i mentioned earlier, has anyone ever bothered to simply ask EA?  
As in asking them to give the files directly, or allowing petroglyph to give them, if they won't mind.

I dont think you can, this looks more like a cinematic then gameplay. If i recall they were thinking about doing cinematics seperate instead but then chose to just use there standard models and added characters with teeth lol.. still cant belive how odd that looked the first time I saw it.

[quote title=sharra wrote on Wed, 11 April 2007 14:05]

i mean if you want a lil more proof that its a cinematic look at the tiberium crystals that nod soilders are standing in. never seen that in the beta screebshots of gameplay
