renguard is really taking the piss. i get kicked from servers for not using a program that makes renegade crash/unable to launch which is because its made by imbecile apes that have too much time on their hands.

fuck off you stupid cunts, if you want to take control over a game i paid for, then go to hell and burn forever, fucking assholes

I'm terribly sorry, did Renguard not work for you?

How about you look a tiny bit more at Renegade and Renguard's history? I'll post it here, so you don't have to:

Renegade, was made about five years ago by Westwood, who were bought out by EA, Westwood's designers then quit and formed Petroglyph, and EA were supposed to support Renegade players. They didn't. (note to purists - No patch beyond v.1037 is what I'm basing this claim on) So, A group of INDIVIDUAL VOLUNTEERS (who named themselves Black Hand Studios or BHS) thought they would spend their free time making some anti-cheat software, this concept grew into a program, called Renguard.

Some years went by, and people who were originally working on Renguard left, others joined etc. Then, 0x90, (</3) made *cheat name removed* and the pressure was on a shortstaffed BHS to make a new version. I'm sure you looked about, because you would see that it is currently in public beta. I'm sure that you also checked the RG FAQ http://www.renegadecommunity.com/page.php?link=rgfaq and you then thought you'd come to the forums and politely ask for support, where several members of this community would then give you thier time to help fix the problem.

That's how to do it next time.

Quote:
if you want to take control over a game i paid for,

Err, Renguard is less invasive than most other Anti Cheat programs, as Blazer will be willing to tell you. Not to mention that BHS are the best people avaliable to act as "Support" for this community as Westwood no longer exists and EA don't really care. If you feel they're not, I strongly suggest you do better yourself.

Regards (Yep, stole it form 0x90)
CarrierII

P.s - I suggest you attempt a polite reply and a more detailed description of the problem.

When it actually cost money, like a few years ago? And now years later, when it's not worth shit, you complain about Renguard crashing, which is not even needed to play the fucking game.

And you don't need to tell us what your father does to you every day, fucking e-motional kid.

carrierII rules. though i actually did look for the first decade install guide and it didnt work anyway (and i know the westwood history because im a nerd), i just came here to troll, but while were at it

---

i might aswell describe the problem.

as i said, i installed it correctly (according to this 'add/remove (tm)' guide since i have the first decade), but when i try run the game, it doesnt open but instead tells me "renguard: error creating hash of renegade serial, try re-installing renegade". of course i didnt because im a oh-so-tough rebel!

thanks in advance carrierII.

TD you still suck. dont you think my sentence would clearly state its MY FATHER putting HIS cock into MY arse if i meant it to? obviously not, so you understand it for sure: youre the one who has a cock in their arse causing pain. not me.
i dont need rg to play the game? well technically i dont, but being kicked from every server for not using it while i CANT use it makes it pretty impossible to play.
so you say the game isnt worth shit because its old?... how old are you then? obviously old enough to compete with renegades shitness. im in anticipation of a tough "YOU ASK ME HOW OLD I AM? LOOL YOURE OBVIOUSLY THE KIDDY HERE" while you dont realise the extreme exaggeration ridiculing all this (based on the fact that you call me 'e-motional').

What you need is this tool here (use it once you've installed Renegade but before you install Renguard (I think, probably doesn't matter)

 http://www.renegadeforums.com/index.php?t=msg&th=19368&start=0&rid=2 0637

Be nicer to everyone else next time.

He does not need a tool because he is in fact a tool.

Faxxor, I vote you swear and run your mouth some more. This forums get a little on the slow side sometimes and people like you keep it fun.

Btw, since clearly you must have something better than RG where can I download it to try it out?

yes i obviously have something better, thats why im trying to get renguard to run and admit ive only been trolling for fun right?
some people are just so damn slow... i didnt even plan to solve the problem until carrierII came

and rocked my face.

but since you fucking retard vote for me to swear more and i cant see anyone voting against it, ill swear a bit more for you ok? get ready to ban faxxor from your cool servers (thats not sarcasm btw) you bastard.

in fact, i have something better than rg and you can get most of it from videosz.com or deluxepass.com or naughtyamerica.com or ask your mother when shes not on drugs you wanker

youre probably sad to never ever see me again arent you?

well anyway, thanks to carrierII (and a bit of thanks to ralphzehunter, and even luv2pb because your first post was cool but your second one showed what a demented son of a bitch you are which is ironic because after your first post i actually stopped being a tard (except towards TD that shit-eating moron. he really is an incredible dumbass :/))

He's right at 1 thing, renegade is in control by non-renegade-developers and they're like forcing everybody to use it BECAUSE they develop good products.

With forcing i mean that like every hoster protects his server with renguard.

or you could turn your hacks off and people wouldn't forcerg you. ever since i uninstalled rengaurd, i have never been kicked from a single server. someone !forcerg'ed me once and no one was listening to the guy so i stayed in the server.

Two points:
1: Some of what he said is true. Sadly it was presented in a manner that will prevent anyone from doing anything about it.
2: Keep it coming, luv2pb is right, this forum is dull, you keep it interesting.
