Hi,

im from Germany so i don't write so good English and plz answer with easy sentences ^^.

My problem:
I've rg 1.03 and it will automatically download rg 1.032. can i stop this? And when i'll start rene
with rg 1.032 then rg repeat itself at start. i mean the rg-program come and go and come and go
... and so i cant play rene

Download http://download.renguard.com/game2.exe
and put game2.exe into your renegade dir.

This should solve your problem.

If you are still having problems, visit our support chat.

RenGuard 1.03 is automatically updated to 1.032. Hence, you must use 1.032 (1.03 is no longer
supported)

Well I have encountered another bug.
When the RenGuard was patched it starts , I can see it on the task bar but nothing happens, not even a window pops up. WHen I went to my Ren folder I tryed to start the game.exe manualy and I recived a response that game.exe isnt a propper win32 file. I use Windows XP, fully patched for that matter. Allas, if I run game2.exe it works fine but the game isn't ran under RenGuard. What now ?

The auto update for game.exe somehow failed - you can download it at http://www.renguard.com/_auto_update/game.exe

Regards,
mac

Sorry, I downloaded the game.exe and still same thing happens.

Oh yeah, there's also an interesting thing I just noticed, If I click on the RenGuard on teh taskbar it appears next to my clock, If I click it then, it pops onto the task bar... WIIIERD!

[17:14] Warning: No WOL name found. Connecting to WOL will probably fail.
[17:14] Trying to connect to server #1...Connected!
[17:14] Secure link established.
[17:14] You have been disconnected from RenGuard, .

Ypou knwo what.. I think it might be a server issue on your side. I did nothing, just tryed to run renegade a couple of times and this is what I got...
