For the past godamn week, that POS anti-cheat program Rengaurd has annoyed the fuck outta me FOR THE LAST TIME! I am constantly (every match and a godamn half) getting auto kicked for not running RG, along with several other players! When it kicks me, it doesnt tell me that i need RG to play on this erver, no, it kicks me as if a game host evicts me, and i STRONGLY reccomend you fix this fucking thing before you loose ALOT of players on n00bstories and Renegade altogether, WTF should we run an anti-cheat- program that doesnt function correctly, this is NOT fair to all the legit players in the Renegade Community, im sorry...

(picked the wrong area to post, plz move it to RG threads)

When Renegade 2 comes out, wtf are you going to do about that one? Plz share...

1) RG 1.0322 DOES NOT HAVE ANY ISSUES ON ANY SYSTEM WHATSOEVER, THEREFORE THEY HAVE NO, I REPEAT, NO EXCUSE TO NOT RUN IT.

2) No server REQUIRES you to run Renguard, they RECOMMEND it, check the dictionary if you're unsure of the difference

3) BHS are NOTHING to do with Renegade 2, AT ALL. (As far as the public know, anyway)

It's nothing to do with renguard that you get kicked, it's the regulators kicking you.

If you don't like it, don't run it.

gamemodding wrote on Tue, 15 May 2007 06:54It's nothing to do with renguard that you get kicked, it's the regulators kicking you.

If you don't like it, don't run it.

Keep in mind, some of the servers auto kick you for not running RG if youve been !force RG'd, and they will auto kick you when the thing loses connection or crashes, but most of the time its RG crashing my game entirely forcing me to restart everything.

And if you say reinstalling RG will fix the problem i am going to E-slap you because it doesnt...

As for the screenshot, faaaar to late for that bro sorry.

The fault doesn't lie with RG per-se, but the belief that it's 100%. I've had to argue server owners down from enforcing RG on their servers because they thought it was foolproof. Took me a while but I got a few servers I played on to drop it to half or not at all, and rely on cheat tests instead (which back in the day were more effective than RG).

This isn't as much of an issue now as it once was, however the bots we are using today are based on the flawed logic and unless the latest versions are different they are tied tightly into RG (announcing people not using it by default, forcerg enabled by default etc.)

As for auto-force on jelly when I played there I wasn't auto forced. I was forced, but it required 3 idiots with RenGuard to do it (it's really not that hard to find 3).

Thanks lavamike. That is true... plus this dropping of players is sporadic so it takes time to know if something we did worked. I haven't seen any mass drops since the master server change that mac did yesterday... you're still going to see a person drop here and there because they might have actually had connection issues between them and the master server.

If BHS released the source to a few people I'm sure they might have a look at it. No mass D/Cs good job, however, there are still a few D/Cs that must be taken care of. They all seem to be targeted to a few people.
