hi guys
i just needed a help with something
when i'm boning a vehicle in renx how do i make the world box be invisible like i mean u could see thou it in renx (i dont mean in game i already know how to do that i mean in renx)
thnaks u for reading
cya

Select the worldbox, go to w3d tools in the utilities tab and check "Hide" for ingame invisibility.

Select the box, goto the display tab and scroll down and select the "See Through" checkbox for RenX invisibility.
