www.aohost.co.uk

Ya, this is Renegade forums, Not Night Regulator forums.

nothing to do with NR

thats the FDS

Make sure your Hostname, password, and serial are all correct, and it should work.

I personally tested him 2 days ago in our server, I tested for every hack possible and everything came clean, no big head, no dmg hax, no bigbody no nothing....but then because *cheat name removed*is hard to test for, we made him type in caps, no use....then I switched myself to the netrual team and set my character as deadeye and snipe dueled him....every shot hit with all 3 of him pausing to "walk" seems someone forgot to reset their hotkeys....plus that and everyone in the server kept saying he tracked their heads or had bighead blah blah...
