Hello i have rectely figured out how to convert models from generals & zero hour to work in renegade, & i have come up with a beta tank model. The pack has a working beta version & a gmax model. I still need to add a second muzzle bone, which i have no idea how to do. so if you wish to finish the model please feel free to, just give me a copy of the finished version.

I basicly took chinas gattling cannon defense turret and slapped it on a repair tank base. sorry for the innaucrate texture for the gattling cannon, but the image files they have dont show correctly on renegade models.

forgot to say this. If all goes well i may master this method soon and be able to start a total renegade conversion. (excepting infantry, i can never do infantry right)

Seems im forgetful today, hee was the other BETA model i tried making, it is the USA Paladin tank. The package will contain a working beta model & a gmax model. Feel free to finish it if you want, I only ask that you send me a copy of the finished model.

It is largely unfurnished, but it works, with weapons coming from right places, all it needs is some texturing & a wee bit of shaping.

if u are going to make a new mod for renegade that has the cnc generals units u dont need to because there is already and mod called generals rise of the red dragon so if u dont have premision from ea to use generals w3d models u will get punished

My first 1 was done like that & i regret it now, Now i just use the meshes as a base for reconstructing personal versions from scratch.

Scud Storm... rise of the red dragon... if i may take a guess there 2 diffent mods. yet both want me on there team.. if im right and 2 mod teams want me, all i ask is that if you want me in show me why you want me in & what you want me to do.

..I could be wrong and its all only 1 mod, but i just taking a guess.

Now i need to be off, i need to get some coffee.

noone wants you, your shit, we can all do that  
Scud Storm + First Hour = Rise of the Red Dragon  
they are spitting again

Scud Storm has been out longer than "Rise of the Red Dragon"

Check out Scud Storm's website.

And...cnc95fan, don't flame people for that...

nodelites, come check us out and make up your own mind.

\*personal flame\* From what I've seen, Rise of the Red Dragon is shit (Personal Opinion; though others may share the same opinion). Any ROTRD member reading this, show me a picture of your paladin tank that you've modeled.
