Take a look at some of joe<insert random numbers here>'s posts in the mod forum. If you're lucky
you'll actually get the source code and all you will need to do is recompile it into scripts.dll.

Why is it that all the newcomers don't use the search function?

you are working with LUA, so custom edit of scripts.dll wont help you and as i said before, i gave
you the start scripts to work with , the rest is up to you..
