well hey
i'm looking for scripts to set a !buy command please paste the html code here or add me on
powerkrachtglenn@hotmail.com and i'll request remote
i only wanna have html code or scripts nothing else
so don't say like: go to and download or go to,, and copy ,, to ,,
that's too hard
only need scripts please help me!!
sn1per74 come msn please

HTML code?????

and whats the point in that stupid poll

A !buy command would need a bit more than just some HTML code of course. Not to mention the
rather dubious statements regarding Remote desktop.

Ok, take that as first warning, no more stupid posts about you needing a !buy command for your selfhosted server. The next post about something like this gets into the silo. If you don't want to do it yourself, then just simply don't ask. No one here is going to waste his time for you.
