Subject: Level edit missing some presets

I seem te be missing some presets that i need to use.
This is in level edit i dont know where this problem came from cos on my other computer level edit is working fine with all presets there.
Tho on this computer i seem to miss quite a few that makes my modding not possible.
I am using windows vista (for some people that might ask)
And so was my other computer on which it worked great.
And i am running the program in administrator status and in windows Xp.

Thanks in advance

I have followed the tutorial there... but it would seem that the registry knew the correct directory. Im using:

XP-SP2
First Decade
Tools2

I'm desparate... please help

rember to put the \ at the end of reg entry like

C:\Westwood\Renegade\

or

C:\Program Files\EA Games\Command and Conquer The First Decade\Command and Conquer Renegade(tm)Renegade\

Make sure the string value is called "InstallPath"

Install the game, simple as that.
