Subject: Unauthorized file game2.exe????

When I open rengaurd to to open renegade it says in the little box:

[08:25] Unauthorized file game2.exe has been found in your renegade directory.
[08:26] You have been disconnected from RenGuard, ImaPsycho.

But I can't find anything called game2.exe in my renegade data to delete. It was working fine last night but now it says that every time.

Also, because it disconnects me from rengaurd, it won't even F***ing load renegade so I can't even play non-rengaurd servers.

Renguard authorised copy here.

This is why Renguard needs to autodownload legit files. Would save Goztow, Cmatt22, myself and the others who help out here some time.

Oh, and you probably coulnd't find game2.exe because;

A) You're using Windows XP and Explorer is set to "Hide extensions for known file types" (Which is possibly the most useless feature EVER)

You can fix that by opening your hard drive (Start > My computer > Hard Disk (C:\)) Then going to Tools > Options (A box appears)
Switch to the View tab, and then decheck "Hide extensions for known file types" then pressing Apply. Then close the window.

B) You're using Windows Vista - and I can't help you, because I use XP.

I am really really sorry for that message. I was having a bad day and renegade just pushed me over the edge. I am very very very sorry for what I said, it is not true and I know that you know what you're saying and only mean to help me. I understand if you choose to ban me from the forums for it.....
Again, I'm terribly sorry.

People like you make my day! First SK, and now you. What is wrong with the world today?

What exactly did you do? I fail to see how that broke your PC, nevermind,

There's a guide to reinstalling Ren here.

Don't mention it.

game2.exe is not in renegade/data but it's in the normal renegade-folder.

If you follow above specified guide to reinstall Renegade from scratch, you really shouldn't encounter any problems. Just do it step by step.
