I use Night Regulator. In the tab Moderators I have added my ingame nick. When Im joining the server, it says "Please page WESTWOOD with; !login <your password> ,to gain your moderator status".

So, how to ... "page WESTWOOD" my login and password?

I have tried from F2,F3, game cmd line... Nothing!

I assume your replacing WESTWOOD with the name of your server? (EG: a0000000000000000000000000675758474 or whatever those retarded names are), and it wont work for a GSA server as there is no page in GSA...

Theree questions:

What is xwis?
What is GSA?
How to find my server's name (something like a0000000000000000000000000675758474)?

If you are hosting the server via GSA there are other ways to login.

On the FDS Settings tab, what do you have the 'Login Server' set to?

I use:

FDS32 1037
NR
Gamespy mode

Page the IRC bot with !login username password

or

Add your password to the password field on RenGuard

How to find my server's name (something like a00000000000000000000000675758474)?

*xiws = WOL (Westwood Online)

*GSA = Game Spy

*something like a00000000000000000000000675758474 = Whatever the name of your server is

I hope this helps
