Does Renx have a measuring tool ?

Can you use a line tool and make objects ?

how do you cut out shapes in a object ?

Can u make an object arc a certain degrees ?

Everyone has to learn somewhere, learning from others, ie asking people here is the best way then trying to learn by yourself or form some crap guide.

Trial and error is the best IMO, because you learn it on your own, and often end up learning other things on the way there. And just for the record, I said that not only because of the amount of questions he asks, but his grammar as well.
