
Subject: W3d import error

Posted by [Gen_Blacky](#) on Sun, 21 Oct 2007 03:43:33 GMT

[View Forum Message](#) <> [Reply to Message](#)

i got this error importing nod stealth tank in renx

v_nod_stlth.w3d

Using coolfires w3d importer

```
in coordsys gmPivots[p] setVert gmMeshes[i] v meshes[i].verts[v]
)
-- to show influenced info at v1.08

1. Make sure that it all was extracted in "Gmax\gamepacks\Westwood\RenX\"
2. Note that the importer will error or just import blob mesh for w3d's that were exported via 3dsmax w3d export.
3. Make sure you are not trying to run the script via MaxScript and are assigning it a key via Customize ~ Customize User Interface

Like so:

4. Make sure you have the version for Gmax.
