So I used to play this game way back in the day when it first came out, and after about 2 years of college I wanted to come back a play a few.

But I can't figure out what I need to play...

I guess maybe I need Renguard to keep out all the cheaters, which is why I quit playing in the first place. But maybe I need something else?

Thanks

<http://www.game-maps.net/>

A lot of stuff there, get the Scripts update, if you computer is recent get update 3.4.1, if not get 2.9.2. The scripts gives you new console commands and lets you use some advanced functions in servers. (e.g. !rank, etc.)

Actually, what he probably needs is the 1.037 patch, so get that while you're at it.

Scripts are optional, but load times are less than a second and better functionality is within them. 2.9.2 is a good stable one, if not get the latest from wherever.

Great guide.....where did you get that one out of aforum somewhere?

Try installing the core patch....
