Wat software can i drag a group of my music on my pc and easy edit the
artist
album
track
title
and etc
to each DIFRENET song without having to right click on every single song

please and ty

Foobar2000, an awesome music client, can help you with tagging. When installing, you can even integrate an optional freedb plug-in.

You can always use Windows Media Player 11, which has access to AllMusicGuide's media information. It'll update everything from the Artists, to people who were involved with writing the music.

You can select a lot of files, right click, click rename, type in whatever you want their names as, click enter, and the first file should be '[whatever name you entered]', and second would be '[whatever name you entered](1)', and so on.
