Does anybody know how to host a game in Renegade DEMO. It has consoleserver.exe, sever.ini, and dedicated.ini in the main folder. It also has svrconfig_cnc.ini in the data folder. When I run conolse server it say that it starts and GSA Q&A activated and the player count but it does not show up in the GSA list. So how do I get it to be able to, or do i start it from inside GSA, all of my ports are open.

This isn't even the proper section for this question. Remember that there are other forum sections besides "General".

Sorry, I posted it here because it is about the demo not the FV so it seems like it does not need to be in the 32FDS topic, but how do I answer my problem?

edit server.ini and svrconfig_cnc.ini.

dur.

You can't see your own server in the GSA lists because you have the same IP.
