They only come in two resolutions right now, 1024x768 and 1280x1024.

Make sure you are running the newest scripts.dll or it won't display properly. These are not RG compatible, so you'll need to play without RG if you want to use them (to do so, use game2.exe).

Download 1024x768 HUD

Download 1280x1024 HUD

Read here for credits and more info!

ooo this looks nice!

I take it the rest of the hud is not included?

I'd prefer just a stock HUD with the scrolling texture, big thank yous to anyone who does that for me, or I will when I'm not busy with 18 tons of fucking maths homework...

If he hadn't showed off with it without releasing it in the first place, then maybe jonwil wouldn't have added the functionality in scripts and people would surely not even have gotten on the idea.

fair point

If you show people something which is really cool and don't release it somebody is only going to "copy" them

Tis good work imo
