As to Scrin, you used photoshop to edit out \*cheat name removed\*from the top left corner, you can see the pixels don't match at all. I have no idea how to make a HUD so im not one of those people 'stealing' your crap.

So..

- 1) Text is the gay, it is hard to read in games.
- 2) Building images should be Renegade's not Tiberium Sun.
- 3) The first radar image has ugly looking metal bars at the top, looks ugly.
- 4) The radar hack you have, you fail at life.
- 5) The car above the radar hack, is also fail.
- 6) You are using a well known cheat, we can tell you edited the top right of the screenshot.
- 7) You a cheater, so you fail at life.

So to sum up, you are putting too much crap in it, simple is better, like Sir\_Kane.

Now that you mention it, it is VERY obvious he has removed that-which-shall-not be named from the top corner. Hence why he is able to see enemy vehicles, so stop with the bullshit excuses about playing on servers with radar mode 2, I don't think I have even SEEN a server running radar mode 2 in years, not AOW ones anyway.

How can i get this in the right Position  
the 100 HP and the 100 Armor.

Always if i try to change the positions then my Ren will crash after the map loaded. (in HUD.ini)  
Now i want to make a new Key (if you press "U" the Building icons and HP should dissappear, but  
how can i do that)

\*EDIT\* now i cant change anything in the HUD.ini or my ren will crash, i think its cause i use my  
hud.dll.

And dont pick on my textures! its only a edited gdi radar from C&C TW wich i edited!
