As soon as I open it, it instantly crashes. I have quite a few terrains and skins that I don't wanna lose but I think maybe those could be part of the cause. Is re-install only option here?

You could always try changing to a different scripts version, but if that doesn't work, reinstall will be the safest and fastest option for you. Check the sticky about reinstalling in this subforum .

You're welcome. Did your previous account not have administrator rights? That could explain.

It did not have administrative status...it used to work on both but now only on one. I think the only thing I added since then was Hero's new Racing Circuit map which is clean.
