Well, bad guys (like terrorists) have to do everything in secret and can't be buying all the expensive weapons. And AK's are cheap but insanely powerful and so the bad guys buy em in droves.

The AK-47 is popular with the "bad guys" because the Russians had (and may still have) far looser rules about who they will sell guns to than the western countries like the USA. Plus the Russians considered pretty much any country or group that opposed the USA their friends (as a rule).

"Of all the weapons in the vast soviet arsenal, nothing was more profitable than Avtomat Kalashnikova model of 1947. More commonly known as the AK-47, or Kalashnikov. It's the world's most popular assault rifle. A weapon all fighters love. An elegantly simple 9 pound amalgamation of forged steel and plywood. It doesn't break, jam, or overheat. It'll shoot whether it's covered in mud or filled with sand. It's so easy, even a child can use it; and they do. The Soviets put the gun on a coin. Mozambique put it on their flag. Since the end of the Cold War, the Kalashnikov has become the Russian people's greatest export. After that comes vodka, caviar, and suicidal novelists. One thing is for sure, no one was lining up to buy their cars."

Wow, accuracy by use of inaccuracy. I might try that on renegade by soldier rushing and shooting around like a loony.

BTW, can someone get some ingame screenshots and post them? I don't normally get files if they don't get shown to me first, so I don't have to search through Ren Data to find the right files to remove.
