Ok, i am still trying to solve the mystery of the No Reload mod. When i go to export/save the mod/document it comes up like this:

I have the objects.ddb from another post aswell but i have no idea what to do with it, i have BRenBot on my server and use ssaow and also ssgm.ini. Are there any compatibility options with the objects.ddb? i would really appreciate the help

Sorry, i am new to all this. The only other addons i have placed in the directory are the textures. I downloaded the program off one of the provided links. also what presets are you on about?

(PS: sry for being such a b00n)

The (TM) has been removed but no change at all. <http://www.renhelp.net/index.php?load=7>
I have followed the guide from this link but even that hasn't worked, the install path was correct to begin with and i still have all the presets missing :S

UPDATE

ok, i have worked out what was wrong

C:\Program Files\EA Games\Command & Conquer The First Decade\Command & Conquer
Renegade(tm)\Renegade

The registry that was put in was missing a "\" at the end of the link, my error i believe. Thank you all for your time but hopefully i will be posting less now that i have the presets ^^ thx again

Okay, I did it once, I ask this to, I don't remeber the website...
something like renegadetutorial.com rentutorial.com
