First this is the wrong section should be posted in the win32fds section and relating to your problem try reinstalling or replacing the objects.ddb and make sure you have everything correct hostname, serial, etc.

Looks like you tried to install SSAOW but did it wrong. I suggest you read the Readme.txt that came with it.

Yeah about that it does not help to well.

this is what it says.

This is a slightly modified ssaow1.5, it has been changed to allow for ai bots to be added server side without the game crashing.

This is NOT an official black-cell.net release, but all source is included with compliance to the public GNU.

I tried going to black-cell.net but there is not a ssaow thing there i got this 1 from game-maps.net

Get the latest SSGM from [www.black-cell.net](http://www.black-cell.net), don't bother with ssaow anymore.
