Hey sorry im posting this here but...

how can i get brenbot working on SSCTF

Quote:anyone have an idea to get the brenbot working with SSCTF for the kill messages?

Is the ctf mode writing the kill messages in a log?
If yes, create a plugin for BR and use "<renlog_regex_hooks>" for example.

right, so
im not a coder.
if someone already has done this let me know and would you please share it?
thank you.
