Hi all,

Can anyone help me with this problem?

Ive been using brenbot 1.5 now for sometime with no problems, for some odd reason i tryed to run it today and it comes up but dont do anything? has anyone ever had this happen?

No settings have been changed since it ran last and both my fire walls permit it as it worked fine for weeks before. When the bot comes up on my screen it will just sit there doing nothing, not even any text comes up.

Hope someone can help tnx

Zorid.

OMFG still no help or addvice wtf is this site for then, it supposed to be for getting help? NVM i got more help from talking to a brick wall.
I wont be posting here again, just a big waste of time.

How long do you keep it open before you shut it down?

And if you shut it down does there apear text?
It should be something like:
"Graceful shutdown. JAY!!" on BRenBot 1.52

You can also try to run the brloader.exe to update
Maybe is that what you need.

Much more i don't know because i didn't developed it

BTW, you could wait a bit longer
