When I figured it out like 6 years ago I thought I was a pretty cool guy knowing a cheat code for renegade, they used to be fun in public games, with sedans and shit, just messin around, and now no one uses them!

Only Troopr02 knows how to do that.

If you like those kind of things, play in EKT Goku's Marathon server. I don't play there anymore but you will like it if you like to use extra characters and vehicles.

And it's not a cheat code lol.

Yeah play in EKT, you get special units! And as an extra free bonus you get about 20 players

using *cheat name removed*as well!

LOL...that's why I don't play there anymore. As of November 2007 (month I stopped playing there), cheaters are dealt with immediately by EKT. I can only speak till then.

I just don't like playing in a server where everyone is using some sort of advantage skin for mines, C4, and beacons.

That was mostly scrin and a few other members who no one really likes, although I will admit, it gives people the opportunity to be stupid aswell as use cool things. I left in a marathon once because 3+ people were actually considering rushing at GDI with chameleons.

I agree. Ususally it is only a few people but unfortunately, it looks like everyone is on hax/ actingstupid. TBH, the server itself is cool and the people who whine are usually holding a grudge.

The server is more for people who want to have "fun" with the extra characters, vehicle mods, and what not.

They aren't used anymore because you can't and never could enable them in ladder games. Most servers these days are ladder, I believe.

I do however like the Acolyte. It's called Initiate in the extras character menu, but it's actually the Acolyte.. the one that can run really fast and carries a chem sprayer
