I recently (tonight) uninstalled Renegade to get rid of the headaches that RG has been giving me recently. However when I tried to reinstall it, I realized I lost the serial code to the game. If anyone knows how to get a non-hacked one, that would be much appreciated.

Okay, I borrowed a serial code from someone that has the first decade. This is just temporary, but I would like to know why my screen is black when ever I try to play.
