Check out my Video:

NORMAL

BETTER VERSION

The only thing you have to do is add &fmt=18 on the Adress bar. (end of the Link)

Yup the high quality feature has been around for about two months now. They should have advertised it a bit more.

There used to be a "watch in higher quality" button, but they removed it or something.

You can easily change the quality by adding &fmt=18 to the end of the url.

You can also change it to always show the higher quality where available in the account settings if you have an account.

It apparently doesn't work on new videos automatically, unless the account holder toggles the account setting like cmatt42 suggested.

By the way, if you like platformers and crossover games, I'd suggest you try out the recent beta release of this game
