Hello everyone.
You may know me as a n00b or some idiot, I know of that. But today marks the second day Ive been put so far down it is unreachable.

Basically I work with website design and photoshop. Ive created many websites including www.BattleForDune.co.uk , It was supposed to help a mate out with his website. So I made it using Joomla 1.0 . However recently [FW]Wolf decided I was not needed and said very ugly things to me, So I took down my work and left. An hour later I return and it is back up, This is MY work remember, So I tell them to take it down and I recieve countless tuants. So, they kept my work without my concent and are now using it illegally, Not to mention their IPB Forum is illegal and was from warez that someone in FW stole it. FW Clan and Battle for Dune stole works from which I spent days of my life on. I suggest you do not support them in any way. They steal things and participate in warez. Right now I may report them to authoritys and tell Invision Power of the stolen Forum. And, Please if you read this, This is completely true. They did steal works from me.

Heres a link to the copyright file (Which he prob will change)
http://www.battlefordune.co.uk/templates/beez/templateDetails.xml

He tried to change the name of the template to confuse me but it failed.

Ive attached a screenshot of the copyright so that if he changes it, You can still see.

To prove it is my template too, http://games.blacksharkstudios.com/cwcwarofthefuture
I used its CSS to make another Mod site for CWC on my domain.

FWWolf, FWSpazmo, FWWhit3, and many others were involved in this.

Im sorry I had to post, but I cant let anyone steal my work.

Thank you for reading,
-Jonathan Lett.

I suggest informing IPB about them for stealing their software, if you believe in karma, what goes around comes around.

Ok for one, i told you that i would take your admin away if you added me to another big convo then you turn all emo and shit and start to threaten to delete everything. So we take your admin and all access to the FPT away from you. Then you start deleting your work which i had no problem with. Then FWWhit3 wanted to use your frontpage which i told him to use the old one we had... And tbh... you've been sending people you copy of IPB ever since you got. SO you can't

say shit. And sadukar don;t comment on what you don't understand NX was going nowhere and takes in nubs. And you just fuck them over even more so i'd just stfu tbh.

Oh so using an old copy is legal? Wow just how much you really do fail. Plus I do not send my IPB anywhere, In fact you actually do that since the IPB you are using is also from millions of other people, Warez.

Everyone here knows what you did, Dont change the subject.

Yea, I spent hours and hours and days on one thing, and it sucks when it gets deleted or lost forever. But you still have the template. Get over it!

The skin was created for BFD by you, as soon as it came into possesion of BFD, it is their property.

As soon as your admin was removed, you threatened to "hack" the website, and when I removed all the joomla files, you said "hahaha look what I have done, I have deleted all the files, I have backups so give me my admin back" or something similar a long them lines. Quite stupid tbh claiming something when I was the one actually deleting the files via FTP.

The link you gave only proves that you created the template, however, since you gave BFD the template, it is no longer yours!

For your information about the renaming of the template, your so stupid you didn't even realise that "beez" is the default skin, there was no intention of trying to confuse you, but the files of the default skin were overwritten.

And, please stop using proxies and other methods of trying to visit BFD website, you are banned for a reason, you are dangerous to communities and websites alike.

So, this contract you claim to have, where are the official copies of it. And where are the witnesses to prove the both parties agreed to the stated requirements.

How much did you pay for the copyright for this template?

About the IPB version being from warez, if this is true, how come whit3 paid IPB for a license just last month, and our subscription with them has been in existance since about 2005.

Seems to me that you are just power hungry, and are only WILLING for somebody to use your work, (which you invisibly contracted and copyrighted) if you are getting administrative powers with them. As this was not in the deal, or any deal that may have existed, all I can say to you is, next time, do things by the book, and you won't get bitten.

FW productions always fights like a little girl and they loose all the time. Wolf had his face red when he saw him self loking like a girl, now it is even worst because about 150 people saw that pic.
My brother just said that he is gonna quit bfd because of the n00bness of BFD team for stealing a web disign. That is just way stupid that they stole it. How worst can it be, they know how to make a mod and they cant make a website. BTH the last disigh that bfd had was fair. Why would they just steal someones. No one would thank them. You might've given him the basics, but you can't claim his modeling talent (Or lack of it) as your own.

I have taught people to play guitar, but I don't claim their songs as my own, just because I was the guy that taught them how to use a guitar.

The fail in this topic is hilarious. Espcially since WHOREQWEER is the one doing it.

WHOREQWEER likes retarded cars.
His brother is an idiot, and apparently knows the future.
WHOREQWEER now thinks that he's soooo cool even though he's a year older as my sister who is four years younger than me. She could probably kick his ass. I'd like to see that.
He's giving Russians like me a bad image.
I still want him banned.

moved to heated discussions for obvious reasons

I didn't read every post and don't really care. I made the website for The KOSs2 from scratch. If I ever leave The KOSs2, I wouldn't ask them to take it off. It's theirs now, I made it for them.

OK, it must be pretty sucky to put a lot of time in something and then have no gratitude at all for it. I can understand that. However, once you place your work on their servers, it's a risk you take. I don't suppose you have any written agreement that your work remains yours (or is yours at the first place) and that you can choose for how long they can use it?

The people that use it now, could however take it off out of courtesy and reverse back to an older template.

As to illegal use of forum software: there's plenty of free forum software out there (phpbb, fud, simple machines, ...).

Subject: Re: Battle for Dune
Posted by -[TT]-Whit3 on Mon, 23 Jun 2008 09:48:51 GMT

old template no longer exists, due to it being deleted by Jonathan when the new template was done. So, doesn't look like they can go back to be honest.

Subject: Re: Battle for Dune
Posted by cheesesoda on Mon, 23 Jun 2008 18:09:21 GMT

Since BfD is not a legal organization, they cannot make any copyright claims on the work. Instead, the work is the property of the creator. Not only has john attempted a "cease and desist", but he physically removed his template when he had the authority to do so. Putting the copyrighted material back up is copyright infringement.

Personally, if you make a design for a community you're a part of, the respectful thing is to just leave what you gave them and move on. However, that doesn't mean you're obligated to do that.

Regardless if BfD has their old template or not, they need to cease using john's template as he requested. Though, in reality, john seems to be all talk (as are the rest of you nitwits), so continuing to use his copyrighted material won't land you in any trouble, as john doesn't seem like the type of guy to take legal action.

Subject: Re: Battle for Dune
Posted by -[TT]-Whit3 on Mon, 23 Jun 2008 18:38:12 GMT

BFD isnt claiming copyright lol.

John NEVER removed the template, i reinstalled joomla and reinstalled the template.

Plus John has completly admitted on MSN he was totally in the WRONG!

Subject: Re: Battle for Dune
Posted by cheesesoda on Mon, 23 Jun 2008 18:41:51 GMT

I could only stand to pay attention to the first page. The lack of proper grammar fried my brain.

Plus, I never said that BfD claimed copyright. I said that that they don't own the template because it's copyrighted to john.

Subject: Re: Battle for Dune
Posted by [FW]Spazmo on Mon, 23 Jun 2008 18:50:29 GMT

Try changing BfD to Jonathan in your post. As BfD are not the ones making the copyright claims. He is.

And so you know, I have attached a log of a conversation we (Jonathan, Me, Whit3 and Wolf) just had.

I think it tells you everything you need to know.

In short, for people that can't be bothered to read it, Jonathan basically says he was just in a bad mood (edit: this was mentioned before i came into the convo. i will try and get whit3 to post that up), and that he pretty much lies constantly.

So you know;
Jonathan = Jon (Original Poster of this topic)
now i have no na = Me
Liam = TTWhit3/FWwhit3
FWWolf | Support = (T|T)Wolf/FWWolf

some irrelevant content of the log was removed. eg wolf doing impressions of a chav towards the beginning of the convo.

You missed my point. I know john is the one who made copyright claims, and I was saying that he was right, and any refusal to take down the design is, technically, illegal.

Yes, I know, john's an idiot and said he was just in a bad mood and now all of this is moot.

Wow, can't believe I read through 5 pages of pure stupid.

HORQWER/Ferkhat/Heavy/whateverotheraliasesyouuse, shut the fuck up and stop calling people "kids". You're younger than most people here, seriously. You have absolutely no right to insult another member because they're "kids"... ESPECIALLY when they're OLDER than you, and not to mention, much more mature. That aside...

To be honest, this looks like yet another case of asshattery from BSS. Really, john is known to be a massive faggot, and has a habit of threatining to hack everything. And not to mention, he's a fucking control freak. I recall him pretending to be EKT-Snippers on EKTRPG once, and then got banned... Then whined about it.

You should just make another website template, use that, remove his entirely, and remove him from your website entirely aswell. He can't bitch about "OMFG COPYRIGHT" or anything, and you're -1 stupid person.

And yeah, it's a few days old, but it needed to be said. The pure stupid emitted from HORQWER and john is beyond any form of mere human comprehension.
