Cheat or not, that skin looks cool. I could use a texture like that on buildings to make a cool map. To bad I don't feel like making one.

That guy is a moron. You should ban him.

Ah, I guess one should check which of those nicks in the cns are from the same ISP as the above IP.

Thanks for pointing that out.

Umm... not every "pro" coder turns into cheating...

There are coders who still code to eliminate cheaters. Otherwise anti-cheating software such as BIATCH or Renegade Resurrection would not have been made. RenGuard has, as far as I know, also kept A LOT of cheaters out and banned them.

So to say that "every PRO coder" turns to cheating is very wrong! Yes, SOME used to work on the right side, and turned to the bad side. But not everyone!

As a member of the BlackInel community, clan, and moderating team, I have come to know people like StealthEye and Ghostshaw quite well, and I do not doubt that those two and other members would never turn to the wrong side!

EDIT: Is it certain that it's a wallhack, and not "just" a skin to be able to see through the walls with?

EDIT2: Saw *cheat name removed*1.3.3 on the screenie... nvm...

I don't know which is more pathetic here... the fact that someone would admit to cheating over IRC or that someone would actually need a cheat to know where people are going to be inside the WF. Even the bloody wallhackers should be able to just guess and get it right by now.

Cheaters deserve to be de-balled with a rusty spoon.
