Could anyone Convert these files, they are original W3D files from ZH, but I would like them to replace the C-130 in Renegade. Most likely, you should just be-able to delete the ZH bones, add Renegade Bones, and a WorldBox. If there are any skilled W3D modders out there for Renegade, here is a change. Thank You

EDIT: oops, forgot the file. Here it is.

It's already been done, see Scud Storm.

I'm aware of what scud storm has and is, but I can't take any of thier files, and redistribute them with my uses. The Textures I thaught where not important, but i will look for them. Problem is there are THOUSANDS of textures used, and not as orginized as renegade.
