Yo, I want to change the bullet explosion for the Apache. but there is only a short list of explosions you can change it to.

I have my own emitter which i want to add to it. but i don't know how.

I have tried adding it trough dependencies, but what would be the next step?

Look at my screen shot so you see what i mean.

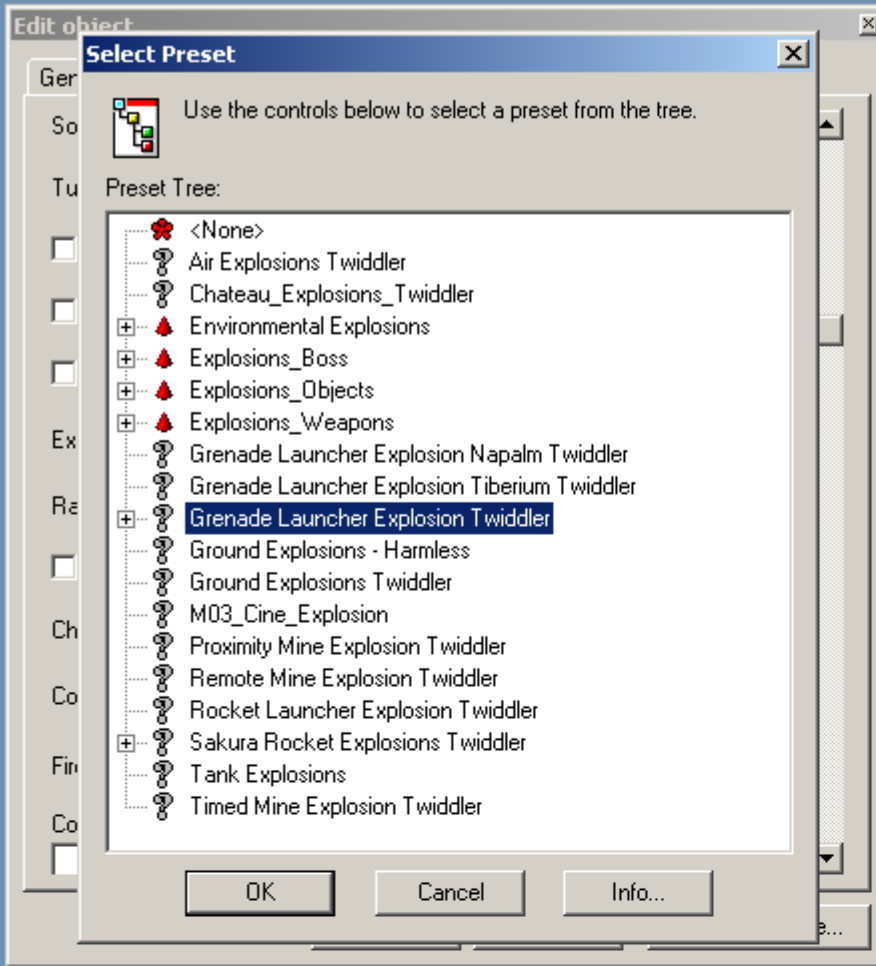

Thx

If it's for a MIX map you should TEMP it to the presets in LE

If it is a ModPackage (PKG) you could ADD it to the presets in LE

I'll give you detail on that if you need later. Don't have time now
