I have a seagate sata barracuda hard drive and a hard drive kit to make it work.

I run a gateway solo laptop.

I install the drive in the kit plug it into usb windows does it's install thing.

I try to open the drive and it say's insert a cd well there is no place to put one lol.

It say's it's a protable media player.

How can i fix it to work and so i can install stuff on it?

if you need more info ask and i will give.

plz help ty

What operating system are you running?

Is it a USB hard drive. Or is it a IDE/SATA drive connected with a convertor to USB making it simmilair but you buy the drive and convertor seperate. This way is usally cheaper.

Did you check to see if the device is in the device manager and diskmanagement?

to do so:

go to start type in the run box or Vista search box. diskmgmt.msc

It's a sata drive in an external case.

i use win xp geting sp3 now it has 2 hours left.

---

here are some pics of the settings.

where is device manage?

And yes it show's up in diskmanagement.

Anything else?

edit: on the kit it has place's for memory card's from camera's could that be causing it?

in disk manager, is it formatted?

device manager can be found by right-clicking My Comp>Properties>Hardware>Device Manager

Notify us of any yellow exclamation marks, or any problems observed on the list that will appear.

Sorry for DP but

does anyone know my prob?

I have called seagate and they said i would have to put it in a desktop well i don't got one.

The screenshot shows the Windows Disk Management console. At the top, there is a menu bar with 'File', 'Action', 'View', and 'Help'. Below the menu is a toolbar with various icons for disk operations. The main area contains a table of disks:

Volume	Layout	Type	File System	Status	Capacity	Free Space	% Free	Fault Toleran
(C:)	Partition	Basic	NTFS	Healthy (S...	6.04 GB	1.42 GB	23 %	No

Below the table, the details for each disk are listed:

- Disk 0**: Basic, 6.04 GB, Online. Contains volume (C:) with 6.04 GB NTFS, Healthy (System).
- Disk 1**: Removable (E:), No Media.
- Disk 2**: Removable (G:), No Media.
- CD-ROM 0**: CD-ROM (F:), No Media.

A legend at the bottom indicates that a blue square represents a 'Primary partition'.

Sounds like you don't have the right drivers installed. I'm guessing the CD that was provided came with the driver. You'll need to pull the driver off the CD on another computer with a CDROM. From there you can put it on a USB thumb drive or upload it to your email or one of the many upload services. Download it and install on your laptop.
