This is where all the Plastic Revolution will now be spoken at.

I am now installing all my software and will start working on it tomorrow when I get off at work at 11 A.M. I would start tonight but I gotta get ready for work at 2 A.M. and it's almost 11 P.M. now. so Gotta get a couple of hours of sleep .

But it's official, I am now starting this baby up again.

I will purchase a website for it tomorrow as well as soon as I get home!!!!

So be prepared for the REVOLUTION!!!!

Plastic Revolution

Plastic Revolution puts you directly in the boots of a Toy soldier, based upon the green Army Men toys. PR will put directly on epic battlefronts ranging from hotstove tops,sandboxes,dark basements,bedrooms and much more..

Ok guys me and N1Warhead are starting up this Mod once again.

I have joined it because of my passion to Mod and for the sheer enjoyment in playing with Army men . Anyways myself and Warhead will be heading this Modification but were are in need of new staff for this project, because i can't do everything that needs to be completed and warhead has already shared what area he would like to work in so with that being said we currently have positions available in the following areas

Modelers

Sound Artist

Level Editor

Character/Weapon Rigging

Alpha/Beta Testers

If you think you got what it takes PM me for desired position and will work from there.

And our site and forums are expected to be completed soon and will be posted here once we have everything setup and completed for new fans to enjoy our progress!!

We now have implemented a Soundtrack area in the downloads section on our site.

You can download soundtracks from all your past and present games alike!

The section is in constant update there's only a few soundtracks on there now.

I'm uploading Halo right now.

[www.plasticrevo.com](http://www.plasticrevo.com)

I hope you all enjoy this newly featured section of our site.

\*Members can only download the SoundTracks\*  
So sign up and enjoy your rights as a member of the Revolution!!!!

I have just now finished modeling the Tan Armies special vehicle .

It's a Giant Robot that can crush people or shoot out giant laser beams .

Tell me what you all think .

I think it looks pretty good. The Robot will be like way taller than the small soldiers running around so better watch your back, you might get crushed .

Hello Com Rads in arms!

We have created the new main menu for all of you to see.

(The font will be changed soon, and the logo will be added soon.)

I hope you all enjoy this, I started on it 9 last night and just now finished it and it's 7:29 A.M.  
(Just watch the video, and you will see what makes this menu unique )

Video

Same here, I haven't personally seen any other mod do it before on Renegade, but of course I could be mistaken, but I just no I haven't ever seen one.

I might do that, I don't know yet though.

I had a plan for this main menu. It's only like 5% done with the goals I have for it, some CRAZY ideas, but the sand box thing might work with my goals as well.

I don't know yet though.

I will look into it.

But as for now, this main menu is the official theme.

I as well have AIM and Yahoo sense you don't have MSN.

Thank you thought for the comment.

We can talk about it on a messenger or a PM.

But better to sign up for the sign and do it, because if you're not a member of the site you're not gonna be able to download the soon to be one day beta .

I really don't remember to be honest Lone0001.  
And Mauler never told me whether or not he got a reply back from E.A. so I take it never answering means no reply or they declined.

madrackz wrote on Sat, 01 November 2008 13:38We make diffrent Models that just look like the Army Men models and have same looking textures oh yeah and with our own style

Nothing will be that of the same stuff you see in Renegade, all o fit will be completely custom, even textures such as grass and sand, everything will be custom, hopefully even the Character animations and stuff, (HOPEFULLY.)
