Sorry, I didn't search too hard for this but I tried searching the forums and got nothing.

Anyway, I wanted to know if anyone had the bandtest.dll that lets you skip the bandwidth test when joining servers.

there's supposed to be a command-line option like "+skipbandtest" but I've yet see it work when direct connecting.

Anyway, yea...Set your connection type to "LAN/T1" or "Cable"

Or rather...just set your connection type in the first place

I appreciate it, but Resurrection worked out for me just fine.
