[View Forum Message](#) <> [Reply to Message](#)

ok, i have created new scope radar for future use.
I optimized them for new script 4.0 (there i made some hidden .dds files for next script's features.
i made this radar for 1600-1200 resolutions only and for texture filtering (so no more pixelated
shit).
Here alpha version (i resize screenshot from 1600-1200 into 1024-768...because Goztow dont like
big images...TOO BIG! So, that means this screen got .gifx16 quality now.

and i'm currently working on other secret project (3 projects), il show progress when i get
permissions...

Nice HUD.

I think 1680x1050 (Widescreen) would be nice too, its often used

ok, now go to your damned game-maps site, them remove OR put on my name as radar's creator, this one what canadacdn "release" as cheap copy of F.E.A.R-Sir Kane's hud

them, if it will be done, il release my work and meybe some other HD textures...k?

if not, dont tell shit about me anymore or some stealing or other...You have no idea what is going on here, so next time thinks about what you are posted...

I just wondering, its happen in 2007 and you are still dont know the true? or you are so retarded and wont care about skin's creators?

well, i have good feeling now, i can tell that story specially for you

Edit: for fucking last time!

back to topic, i have rendered and recreated & increased RGB 12's colors for all renegade icons (like this PIC icon) il showed old work to Madrackz long time ago...

Jesus Scrin, what would it take to get you to stop being such a massive faggot?

You being an uptight showoffy cock like you always are, nobody would ever expect you to release jack shit. Just for being a cheating twat you deserved it anyway. Get the fuck over yourself.

The only reason I released that hud.ini stuff was because you were being an arrogant cock-tease with your work. There's nothing I hate more than a show off.

On the other hand, the HUD he posted in this topic does look very nice. (Assuming Scrin made the texture himself).

well, main reason why i dont post here my projects, its because that Iron-Donkey put it into his game-maps site with tag Creator: Unknown or with random ren player's name (he have bunch of ass lickers...)

I gave almost all my data to Di3HardNL, but unfortunately his PC cant run latest scripts 3.4.4 and shaders.dll (windows libraries)
But Di3 made alot cool stuff now, so all great

So you're basically not releasing any of your work because Game-Maps didn't know you made that asset. That's pretty cocky.

If you're not going to release your work, then I do not see any reason why you would be showing them off other than cockiness.

When I pm'ed him he had no problem at all. I don't know the entire history with Scrin but these flame comments aren't making anything better. I mean this is a forum if you don't want to see any stuff that Scrin made then why are you coming to this topic and reply to it?

Anyways it is a nice hud only I still prefer the default

Looks good, especially the icons you use for health, ammo etc.
Hardly anyone noticed it (yet, or didn't said it in topic) but is that Personal Ion Cannon using First Person model of the weapon as World model? Cause it looks really sharp, with the edges, and looks high quality.

The cliffs at the back of the airstrip look awesome too, different then the normal skin it is using for the cliff in Complex.

I know it re-positions stuff based on resolution, something that is really lacking in other versions...
But what other features make it more awesome? I can't remember what else there was about it,
was it building health updates or something?
