I have recently came across some really nice HUD mods I didn't know of before. I was wondering if anyone knew where I could get the mods that has a new radar at the botom left, it has a coulerful overview of the terrain what looks like two score boxes at the bottom right and your health and armour in two boxes also.

I hadn't been into HUD mods before but now I'm more open to new things. I also plan to use Christmas skin mods for this years christmas server =D hehe!

if not, dont tell shit about me anymore or some stealing or other...You have no idea what is going on here, so next time thinks about what you are posted...
I just wondering, its happen in 2007 and you are still dont know the true? or you are so retarded and wont care about skin's creators?

well, i have good feeling now, i can tell that story specially for you

So if I say I made Renegade, I made it?

He might have created some/all coding of the HUD, but Canadacdn created the (look) of the HUD, and the HUD itself is a 'Visual' thing, therefor, ITS NOT created by Scrin BUT BY Canadacdn. Still needs a credit though imo, towards Scrin's coding.

Also, if you read the topic about the HUD......

that's true! but his 'visual thing' is too low quality...
Sir Kane got perfect quality, i remade it out from F.E.A.R renders (its good quality also)
and canad just copy and paste it out from SK's screenshots, im sure its ok for all of you, but i want my credits, for my code which is located inside "his" hud.ini
i lose too much time for that code (lol Jonwil put me into igrore list after my "help PMs"

i can do one good thing for you all, i can release my (or Sir Kane's) perfect quality textures for that hud k?

Well, since it's been since 2007 right? Well, can we not all live and let be? I mean, a HUD is a HUD to me lol!
I admire the creator('s) of the HUD as it is most impressive. I'd rather leave it at that and 'hope' for no arguing. If you feel the need to settle this on this topic be my guest.

It's entirely up to you!
It's a good HUD I'll tell you that. As for who made the HUD, I'd call it a joint effort.

I was just wondering, I uhh have a cruddy computer lol! I can play Renegade on Ultra high but on a resoloution of 800 x 600. 1024 x 768 goes all funny O_o
Will I be able to run the HUD on my computer?
