I wanted to make a skin set of all these oddly collered units for nod, but my dds conversions won't seem to work for this one file (so far, but it worked for sakura). Help? I'm using Gimp (i followed tut on renhelp), and have tried all 3 dif convertion methods (dxt1-3). Can some one convert this dds to the working dds plz? BTW: the original file was 9 frames, the new one is 7... how did...

dxt5 is for transparent stuff. Skins with a alpha channel.

i didn't try dxt5, none of the tuts said to do so. anyway, thank for the conversion ErroR

=samous

EDIT: ... the converted vs didn't work ErroR, its still all black, and not neon-like.
