Set max players to 1 and untick Dedicated Server, those are the only settings you need to change beyond what maps you want to play.

You sure you have Update 1.037 installed? I'm not sure if that's relevant, but...

Try showing screenshots of your settings.

Or better yet - save your settings and then post the INI file it should generate in your data folder.

Do you use Renegade Ressurection OR are you running on Vista?

Also, is there a svrcfg_cnc0001.ini in your data folder?
