Hello. I installed Renegade from the disc, and after install was complete went into Westwood Multiplay, made up a nick and password and started playing immediatly. Have not installed anything else.

Now when I try to shutdown my laptop it just stays thinking about it and does not shutdown. I have to do a hard shutdown for it to shutdown.

It is a Vaio. Vista Home Premium.

Any help????

I get this sometimes, it's really weird. I'm not strictly sure it's related to renegade though.

Oh no this problem is just Vista(imo) it happens to me sometimes, Vista just hangs while it tries to shutdown, unrelated to ren(imo).
