ive just baught a new pc with windows vista, now i had no problem installing and playing however when i do play the screen for some reason only appears in 1/4 of my screen the rest is blank (black) then once game is shut down it goes back to full screen, any one have any ideas how to change this as ive racked my brains and have come to nothing, i would be very thankfull. . . .

Peace

NOTE:: Downloading Rengaurd and CorePatches Solved This Problem For ME ::NOTE

Make sure you set a correct resplution of renegade

*If you have Renegade alone:
Goto the install folder and run WWConfig.exe

*If you have The First Decade:
Click on renegade and click yes when prompted for the configuration utility.

Also make sure you run as admin

for running as admin: press rightmouse button -> Run As Admin.

A good resolution to start with is using the same as you run windows. By most people this is 1024*768 but on new systems it's 1600*1200 most of the time (1 or 2 exceptions left beside   )
As far as i know and experianced renegade sets the default resolution to 800*600 which can

cause problems on newer machine. And please don't even try 640*480

lol i thought you already followed all the steps in the stiky's on the forums

And about seeing you ingame: small chance
currently playing some other games. I have a new PC and want to try some of the newest games finnaly   Maybe later i'll see you
