<http://www.blackintel.org/?page=downloads>  
Go down to "BlackIntel Server.dat" and download it then place that server.dat into your Renegade Server folder, not data(it should ask you if you want to replace it: say yes).

Now it should allow you to launch/play Renegade while you have the server open.

I suppose you aren't running a dedicated server? Add "+multi" in the command line (open shortcut, edit "blablabla/renegade.exe" to "blablabla/renegade.exe + multi").

Are you logging into XWIS with the same nickname you're using for your FDS? That will boot your

---

FDS offline.

start renegade.

start server.

This is just as easy (as Goztow said):

<http://psumaps.com/forums/index.php?topic=449.0>

Idk wtf people are talking about server.dat for.

---
