When someone types !restart the FDS gets ready to restart then i get and error saying "Renegade has encountered a problem and needs to close. We are sorry for the inconvenience." If i close it the FDS close then reopens no problem but if i'm not there the error stays and server goes offline till i get back any help?

Ignore the message. It happens when Renegade crashes on exit(including server).

Crashes with modded scripts.dll/ssgm scripts.dll. So, you would need to fix the underlying code that is crashing.

At least try it. It is on system disk.

I disabled it and no more "Renegade has encountered a problem and needs to close. We are sorry for the inconvenience."
