hud.ini with scripts 3.4.4

read bhs.txt

make a hud.ini in your data folder then change these settings

Quote:There is new code that lets you change the color used for the teams (i.e. red for nod and yellow for gdi)

You can also change the public and private message colors.

Note that the hud.ini file is parsed on the server too (for the colored message send commands and the get color engine calls).

This requires bhs.dll on the client.

You create a hud.ini file that looks something like this

```
[General]
NodHouseRed=255
NodHouseGreen=0
NodHouseBlue=0
GDIHouseRed=255
GDIHouseGreen=204
GDIHouseBlue=0
PrivateMessageRed=0
PrivateMessageGreen=0
```

PrivateMessageBlue=255  
PublicMessageRed=255  
PublicMessageGreen=255  
PublicMessageBlue=255
