ok, here some of my another projects...i have made that reborn ramjet replacement for Reaver's RenZ0r Nitr0 mod, but now its public... Original scope's look idea by Di3HardNL, but i have to remade the whole w3ds to decrease ammount of bugs (since original one haven't reflections), and now its perfected

and second one is the cyborg commando cannon as repair gun with new f_ha stuff and other effects+muzzles (like animated scopes) (only 1 small bug with -0 scope positions, but its ok)
The ramjet have invisible projectiles, (that means you can't kill the soldier/played by hiting the gun... you cant aim it, so its=eye!)

Nice job Scrin, I like your work. It is good that you release your work.
It can be that you made that reborn sniperrifle for the nitro but I wont put it in.

Pretty cool. The texture on both of the guns is a little plain aside from the screens and such, but good nonetheless.

thanks scrin, i'm glad you've decided to release some stuff. I like both of them

I've attached two skins for you. Also, a recolor of the scope, because I like green better (night vision). I think it looks kool without skinning the scope with camouflage.

Good to see you release some things. Could you please keep in mind the rule about attaching your files to the post you make, please? It will make sure the files stay available for a long time.
