ok, i found that ramjet on damned turbo squid in 2007, but now have the time to add effects on it
and fix bugs, (i have remade animated beta hud-scope from E3 on it, so test it first)
p.s.1 no video because i'm the lazy gay!!2
p.s.2 you can see the 2007 version on my old signature

Is it just me or is 2,2 MB for a texture a bit much? :S

Looks cool, btw!

Looks cool, btw!

It's probably a large texture file. The larger texture files give a higher quality of the texture, although in Renegade, textures are often taken down in quality simply because of the engine/whatever. In short, Renegade textures aren't as good as say, CoD4 or Fallout 3. Although this one turned out nice.

I'm actually considering using this, no matter how much Scrin's annoyed me in the past. And the fact that there's only one laser pointer is realistic.

Yep, it moves in a circle. Kinda wierd for a Scope.

To me the scope is the main reason why I downloaded and am using it. The gun also just seems smaller and easier to use lol.

its take 2 min for me to increase the model's size (and all parts)
i need new ideas ok?

thanks for the positive feedback on my skin for it.. but it's very simple really lol

1. Google Search camouflage texture
2. Copy & Paste, the one i found was a lot smaller so I just duplicated it to fill in the gaps and hoped it wouldn't be noticable.
3. Merge all the camouflage layers, and set the blending mode to overlay. That gives the gun the

design of the texture, but keeps the gun's details still visible.

heh
