Ok everyone, i present you an epic texture pack from C&C 3/Kanes Wrath.  
This contains alot of graphical images in it, for example, buttons, skins, icons ect...  
They are directly from the data. Its actualy been ripped by a program, but it wasnt a "push button, done" it took 4 hours.

Examples:

Terrain(forgot)

User Interface:

Effects:

Skins:

Targets:

Unit Icons:

What can you use it for:  
This is excellent for cutsom huds. (hud.ini)  
Terrains, it got good textures for maps.  
Targets can be used as reticles.  
And all of your other imaginations

Mega Upload  
Rapid Share  
Enjoy the pack guys.  
-YazooGang(?)

STICKY THIS!!!

## File Attachments

I would recommend spending more than 3 seconds writing then, I can barely understand what you're saying.

Hmmm I'm not sure what to do with this. Is it legal to rip ressources from another game? My hunch tells me "no". I'll make a topic about it in our mods lair. Until I have more certainty, I'll leave the topic here.

BFMEII is built on the same engine as C&C3 and also made by the same team, so they probably left it in there.

I know that, but I still found it odd that they left it.

If I remember right, Generals, BFME and BFME II, Tiberium Wars, and Red Alert 3 all use the same engine (albeit different versions, some with different names). The SAGE engine is based on the W3D engine, which Renegade uses, and is now known as RNA.

There's a small possibility, but not a direct conversion, no.  
It'd have to be imported and exported as a .w3d before it'd even work.

The C&C3 Mod SDK came with a sample mod that used a model from BFMEII for a unit if I recall correctly.

For the people who are wondering, the X Ray Engine (S.T.A.L.K.E.R Shadow of Chernobyl and Clear Sky) also uses DDS files for most of the skins ingame (weapon icons, enemies, HUD etc).

I think it would be possible export those too.

This is what I got in amount of DDS files, only because i'm using a couple mods. The game itself probably uses way more (not sure if it has a file like always.dat):

1 thing, the ripper i used captures the textures as a dds file. It doesnt export it from the game it self.
