Yeah, scripts doesn't play nice with single player. Do this:

Open your Renegade root folder, and rename scripts.dll to scripts3.dll.

Then, rename scripts2.dll to scripts.dll.

Once you're done with single player and want to play multiplayer, just follow those steps in reverse order.

MGamer wrote on Sat, 09 May 2009 12:08its called overheating  
^this. My graphics card did that when I played C&C Reborn for the first time because I hadn't removed the dust from my video card recently. IMO you should check for dust in your card as well.
