Tbh I don't really like it. What you could do is get a base picture. (Standard mrls a little bit

greener). After that paste the tiberium over it.

Z0mgzz the hudzz

Nah the mrls doesn't look too good, put a bit more work into it. Try using the texture that the mrls already has and apply the tiberium over it with layer options

Looks better. But you might change the hue of the MRLS so the whole thing looks a little greener to match the tiberium scratching things on the vehicle.
