Can anyone explain me why the agt would need such a huge antenna next to it? :-S

From an artistic point of view, it looks quite nice. But it doesn't really make sense to me.

hmm ok, but you know, when AGT is launch heat rocket from the top, its came out from nothing...  
now i been working with model to create something like mammoth tank's tusk (rocket launcher aggregate)

does it have a damage model now? because at di3's agt with antenna if the agt died it would still look fixed.

No, but I could make it when you destroy the AGT the flashlights will go out and I could give the pillar a darker texturee. But i might be to lazy for that since this is a very old project

Not been on this forums before so sorry I don't know that.

But I don't see the problem myself, it doesn't make you aim better or so, and a good player will always hit the J button once EVA said 'somebuilding under attack' every few seconds.

because if more buildings are attacked at once, you can instantly see it, i mean, it says under attack, but there is an interval of it saying it, and happens to only 1 building at a time
